You can use Photoshop Elements 2019 to edit and work with various types of images in batches, like layers and selections. It is a simple way to edit images with basic features. You may ask, what is the difference between Elements and Photoshop? Elements is a free version of Photoshop, you can use it for free. Some functions are limited or you have to buy Elements to use more features, you can see the differences between the two below: Image editing and adjustment Elements is a basic editing tool that is mainly used for basic image editing, adjustment, manipulation and so on. The Elements 2019 interface contains only the Elements editor. You can not use the CD-RW drive or use high-quality tools such as the Watermark tool or Spot Healing Brush. Elements also has a limited number of adjustments and tools that are intended for a more basic editing. It has basic tools like levels, curves, gradients and so on, and has one-click presets. The Elements 2019 interface has just basic editing tools, but you can find additional tools in the new version. For more advanced editing tools, you should use Photoshop. Image sharing and management Elements is mainly used to edit and share images, not to import new files. You can only share images to Google Drive, the iCloud or OneDrive. It also has limited image management features, such as free and paid storage. However, you can export all the images in one folder into the Creative Cloud. You can also save your library in the cloud or copy it to your computer. Search tools In Elements, you can not search your image library, so your data is scattered on your computer. In Elements 2019, you can quickly search your images across your computer and Google Drive, and download them all into one folder. Image editing tools Besides using a basic image editing tool, Elements 2019 has some more advanced features. You can use Photoshop Elements 2018 to make non-destructive edits to photos. There are more options to edit images in Elements 2019, such as increasing the sharpness of the image, softening, adjusting brightness, contrast, adding an object, frames, portraits, and placing the object inside the frame. You can use a similar interface to adjust the basic image editing functions, but Elements 2019 has more tools and options to edit images, so it is more advanced. I've had my 1997 Excalibur in top condition for several years and it was ready to hit the road. To give it another whirl, I swapped over my favorite parts from my 1998 Excalibur that I'd been replacing worn parts with for the past few months. The only thing that was new was a smaller front fender made in 1997 and the original rear brake light. Whenever I drive the '97, it feels like it is only getting the minimal attention it needs. I've gotten used to waiting for the part in the rear tire to start slipping, as well as noticing a bit of condition when driving it that I did not for the '98. But, since it is such a used part, it is hard to imagine that there aren't a few kinks in the road that I should have noticed. I think that I've finally adjusted to the '97 and it has actually been good for me to drive; however, I am reminded of the effort and effort needed to get used to driving a 1998. RPMs The after market ball bearing/drive shafts on the last Excalibur models were known to have a particular RPM pattern. It is common practice to document the rotating speed of your vehicle to ensure it matches with that of the Excalibur. There were two distinct trends, neither of which I am familiar with. Here's what I did find out about each of them: • Trend 1: 8700-9250 RPM. It seems to be the average for these cars. My car was 9350 on the top. • Trend 2: 8500-8800 RPM, although my car was 8810 on the bottom. Normally, when the RPM is listed as a range, it means that any two of the values within this range are in sequence. A good way to determine if your RPM is in the upper or lower range is to simply look at the next number. For example, the number 9080 is further from the 9000 you see in 9820 than that in 9250. In a word, I'm not sure what this trend means. Engine I ran across some of this information while reading the binder that came with the Excalibur frame: • The motor is a chain drive-type (4WD-TDI, 4WD-TDI 4000), with the outside rear wheel driven by a shift

PHILADELPHIA — If you're planning to find "real" rap in Philadelphia on a Saturday night, February 2, don't even think about stopping at Proudly Presents' (3411 Woodland Ave., Philadelphia; 215-922-0255) house. You can't just jump in and out of the main room with your critical eye; you need to sit through the first act. You can't just go in the back and look at the merch; you need to stand in the back and look at the merch. And you can't just put $10 on the floor and then instantly run away because the night's headliner, D-Block (real name De'Aundre Bunch) and his Mob Figaz crew, will bang your face into the floor and tear it off. Chances are you won't be heading back to Proudly Presents after this show. Even if you think you will, you'll get back out of there. D-Block and Figaz are currently the only rap crew based in Philadelphia that regularly make national headlines, earn plum spots on the lineups of national concert festivals and sound good every time they flex their chops. As detailed in an oral history I ran across about a year ago, D-Block is a 30-year-old Philly native who works for Philadelphia police, and who has been a fixture of the hardcore hip-hop scene for so long that when you hear him, you can't help but think about Jay-Z. Their current tour with Earl Sweatshirt has defined the last year for the duo — though so has their prolific (and successful) production work, which has earned the group a spot at the top of the 2011 XXL Freshman class. Figaz, on the other hand, has created one of hip-hop's more promising and long-lasting careers offstage, as he's been the musical director of the band g.o.d since 2005, directing four studio albums, three EPs and almost a half-dozen singles. Although the Philly native tells me he prefers to keep his own personal music separate from the band he manages, he still has a tight schedule and a way with a microphone that makes it hard to get him offstage. It's hard to predict what the 26-year-old musician is going to present for the Love & Hip-Hop: Atlanta (VH1) audience, but when I found out he was playing an upcoming show at Proudly Presents,
