each mission is set up with a variety of weapons, including the tommy gun, the m1 garand rifle, the thompson sub-machine gun, the m3 sten and the m1 carbine. missions generally have three objectives: kill all enemies, take out the enemy vehicles and get back to the friendly safe zone. however, unlike other games in the series, these objectives are not always the same: in some missions, you have to get to a certain position to open a door, while in others, you have to kill every enemy within a certain amount of time. at the end of each mission, the player will be given a certain amount of points that can be spent on perks. once all

the missions are completed, the player will have earned a special medal, which will be awarded in-game. but at any rate, the footage and a couple of minor in-game glitches aside, it's a very accomplished looking ww2 shooter - a title that looks set to answer the question of what medal of honor would look like if it had been made during the second world war. however, as a series of vignettes strung together by the odd cutscene, the campaign is inevitably going to make for rather a long and sloggy slog if you're not careful - something that's especially true of the "military" sections, where you'll find yourself directing your squad to take out a group of japanese troops and then engage in a bayonet-wielding "hand to hand" battle, and it's not as if the sections aren't entertaining - they're just a little long-winded. in fact, the only bit of gaming footage on show was a sniping section that looked good, with a decent variety of targets, although again there were problems with the ai. we were also a little

puzzled by the offhand comment about it being a "trophy hunt", and wondered if that meant that players might be scoring points for every person they shoot, but if so, that's a fairly inhumane system for a game to implement.

as the war was ending, the u.s. army wanted to keep their best men in one place, so they created the officer candidate school at the end of world war ii. the school was designed to teach enlisted men how to become commissioned officers, and more importantly, it taught them leadership and military discipline. these are skills the u. army needed in its own ranks, especially in the midst of a massive conflict, and many of the school's graduates went on to be some of the most famous and influential men in american history. to honor the men who were at ocs, the medal of honor pacific assault game includes a squad-based combat system and a multiplayer mode that allows you to play as a member of one of these groups of men. you can also play as a japanese soldier and command your own men, but that's an entirely different experience. for a first-person shooter, pacific

assault is a surprisingly vast game, featuring a large number of environments, large open areas with lots of vehicles, a lot of npc enemies, and a relatively large number of weapons. it's also a game that builds upon an established series with a large number of new features. in previous games, you've controlled a single soldier, but pacific assault opens up the series to squad-based first-person shooting, and features a sizable, yet manageable, number of different weapons and equipment. the game's multiplayer is also improved with a new and improved ranking system, as well as a number of different game modes. this includes two-player co-op play, and a mode that lets you play as a japanese soldier who assumes command of the team. 5ec8ef588b
